Sloan's Liniment is a quick and reliable remedy for lameness in horses and other farm animals.

"Sloan's Liniment surpasses anything on earth for lameness in horses and other farm animals. I would not sleep without it in my stable."—MARTIN DOYLE, 422 West 12th St., New York City.

Good for Swelling and Abscesses. Mr. H. M. Gurns, of Lawrence, Kan., R.F.D. No. 3, writes: "I had a mare with an abscess on her neck and one on her leg. Sloan's Liniment entirely cured her. I kept it all the time for calls and small swellings and for everything about the stock."

Corner of Georgia uses Sloan's Liniment for Hog Cholera.

"I heard Gov. Brown (who is quite a farmer) say that he had never lost a hog from cholera and that his remedy was a table-spoonful of Sloan's Liniment in a gallon of slop, decreasing the dose as the animal improved. Last month Gov. Brown and myself were at the Agricultural College building and in the discussion of the ravages of the disease, Gov. Brown gave the remedy named as 'sloping'."

On a Needle Point. Indirectly Pasteur solved the famous medieval problem. "How many angels can stand on the point of a needle?" Sir W. Crookes said that altering the word "angels" to "devils" he had found that of one of the deadliest diseases that had ever scourged mankind.

Not Worthless. Patience—Why, her husband is absolutely worthless. Patience—Oh, you shouldn't say that. You know it has been proved that a man weighing 150 pounds contains enough grease to make seventy new candles and a pound of soap. You're Statesman.

A Real Hero. From boyhood every man wears in his heart the image of his ideal woman. Then he marries the substitute. She is a woman who says nothing. Florida Times-Union.

Simply Didn't Do It. Mother—Now, Willie, tell me the truth. You forgot to wash your face this morning, didn't you? Willie—No, mother, honest, I didn't forget. Judge.

His Special Treat. The vicar of an east-end parish is telling a queer little story that illustrates the relations between husband and wife in that quarter of London. He was returning home one night when he overtook a man who was violently abusing and using a woman. The poor woman was coming off a damaged eye and she had already got a damaged eye when the clergyman went up and remonstrated with the man on his behavior. For a moment the blows and abuse were stayed, the man being so surprised at the interruption to continue. Then, to the astonishment of the peacemaker, the ill-used woman seized him to go away. Wiping her eyes with her hand, she informed him something.

It's all right, sir. Let me be. I'm a wife, and it's his birthday. London Answers.

An Opening For an Angel. One of Oscar Hammerstein's scene painters came to him at the Hammerstein London Opera House one day when Hammerstein was in the midst of his difficulties and said: "Oh, Mr. Hammerstein, I have just painted a beautiful scene, a most exquisite scene."

"What is it?" demanded Hammerstein. "It is a sylvan dell a most charming landscape."

"But," shouted Hammerstein, "What do I want with a sylvan dell? Paint me a banker. Paint me a banker!" Philadelphia Saturday Evening Post.

New York's First Express Wagon.

"It was in 1841," said the oldest inhabitant, "that I was a witness to the wonderful event, the appearance on Broadway of the first express wagon. It was a one-horse affair with a very white canvas cover, on which was painted conspicuously in very black letters the word 'Express.' The wagon made its way up and down the thoroughfare, to the wonder of beholders, who soon became curious to learn what it meant. Men came out of their stores and windows to look at the ridiculous sight. People of that time were considered either very proud or very considerate. A tale went the rounds that a woman customer of A. T. Stewart, the dry goods merchant, had required him to send home to her some insignificant purchase she had made at his store and that he had hired a dray to do it, sending the bill to her. In this he was considered entirely justified. Hitherto delivery of goods was made by any chance carrier who would go out of his way to get what was required to be brought home."—New York Sun.

A Matter of Tact. Mr. Brown was in a bad temper, and, as Mrs. Brown knew, there was only one way of curing it—to cause him to undergo some misfortune. He did this by sending her a letter, in which he told her that he was going to leave her. He did not say so, but he implied it. He did not say so, but he implied it.

"Jane," he grumped at last, "you're as dull as an old owl. Sinking, I suppose, because I refused to buy you that new hat."

"No," sighed his wife; "I wasn't thinking about it. As a matter of fact, I've been turning out some old letters, and oh, it's nothing of importance, only a lot of the blues."

"What letters?" "Love letters?" "Some I wrote to you, I suppose?" "No," said his wife calmly, "some I received before I'd met you. It's of no consequence now at all. How is your cold?" Exchange.

Grattan's Study of Oratory. Professor Howard Marsh has just told the story of a lodger who complained of the "unnatural" above him who walked the floor all night talking to himself. The "unnatural" was John Bright preparing his speeches, and he re-enters him in like circumstances concerned his landlady. "It was a sad thing," she used to lament, "to hear her young son talking half the night to somebody he called 'Mr. Speaker,' when there was no speaker present but himself." Grattan's studies in the art of speaking, however, were not confined to the bedroom. He often walked in Windsor park addressing the oaks in parliamentary strain. And there is the story of the polite stranger who found him haranguing an empty gibbet. "However did you get down?" he asked. St. James' Gazette.

Primitive Breadmaking. The Arabs adhere to these ancestral principles of breadmaking which have been sanctioned by the experience of ages. The very first baker of bread that ever lived must have done his work exactly as the Arab does at this day. He takes some meal and holds it out in the hollow of his hands while his comrade pours over it a few drops of water. He then mashes up the moistened flour into a paste, pulls the lump of dough so made into small pieces and thrusts them into the embers. His way of baking exactly resembles the craft or mystery of roasting chestnuts as practiced by children. There is the same prudence and circumspection in choosing a good hearth for the uncooked, the same enterprise and risk in pulling it out with the fingers. Kinglake's "Eothen."

The Days of Dogcart. There are probably people still living who remember when dogs drew carts in England. These original dogcarts, which were suppressed by law in the middle of the last century, were largely used by costermongers and the humble members of the fancy for Sunday outings. The dogs employed were large animals, of mongrel breed, with a strain of the old English mastiff. A twenty or thirty mile run in and out was nothing to them, and they kept up their strenuous journey with a scanty allowance of bread soaked in beer. London Mail.

A Talleyrand Retort. The Duchess of Launaguais, who was somewhat given to making poetry, could not think of a word to reply with coiffe. Turning to Talleyrand, who happened to be by her side, she said, "Princess, give me a line to coiffe." "Impossible, duchess," replied Talleyrand without a moment's delay, "for that which pertains to the head of a woman has neither time nor reason."

Clever Woman. She doesn't you think a woman is clever enough to do any work that a man can? He she's smarter than that. Why, she's clever enough to make the man do the work and give her the benefit of it. London Telegraph.

Pale Faces

Pale-faced, weak, and shaky women—who suffer every day with womanly weakness—need the help of a gentle tonic, with a building action on the womanly system. If you are weak, you need Cardui, the woman's tonic, because Cardui will act directly on the cause of your trouble. Cardui has a record of more than 50 years of success. It must be good.

E 60 Take CARDUI

The Woman's Tonic

Mrs. Effie Graham, of Willard, Ky., says: "I was so weak I could hardly go. I suffered, nearly every month, for 3 years. When I began to take Cardui, my back hurt awfully. I only weighed 99 pounds. Not long after, I weighed 115. Now, I do all my work, and am in good health." Begin taking Cardui, today.

Oppressive Politeness. M. Ernest Lavisse has turned aside from his historical labors to relate a bonnet by his friend Massenet. It was at a time when the musician was changing apartments and the historian inquired the motive of the change. "I was too well known there," Massenet replied. "Everybody was too oppressive to me. Only the other day I happened to buy a penny stamp in a tobaccoist's shop. 'Pray do not trouble to carry it,' said the tobaccoist. 'It will give us the greatest pleasure to send it round to you.'"—Westminster Gazette.

Nicknames. "Where did you get that knife?" asked Willie's mother. "I traded a top to Puppy Johnson for it."

"What that Puppy Johnson with whom I saw you playing a little while ago?" "No, that was Piggie Davis."

"Dear me! What dreadful names! Come here. How did you get that top?" "I caught it on a nail when me and Ratty Robinson were nixin' it up this mornin'."

"Mercy! I don't want you to have anything to do with those boys any more. Their families must be low or they wouldn't have such names. How in the world did they ever get them?" "I don't know. They call me Pimples because one day I went to school with a pimple on my nose."

The Dyspeptic Ostrich. Long ago the phenomena, power of the stomach of the ostrich was immortalized in the idiom of all the world's great languages. To have the "stomach of an ostrich" is the synonym for incomprehensible digestive power, the supreme flight of gastric audacity. Those omnivorous beings of the dime museum who devour hardware in public for so much per week are always down on the bills as "human ostriches." Well to make a long story short, the whole thing from beginning to end is nature faking pure and simple. As a matter of fact the ostrich, if not a confirmed dyspeptic, has a most delicate digestion. The ostrich's stomach is not a stomach at all. It is a mere receptacle for food, and it is not a stomach at all. It is a mere receptacle for food, and it is not a stomach at all.

Leaders Who Changed Their Names.

Jeremiah Jones Colburn was the original name of Henry Wilson, who was elected vice president with Grant in 1872 and who had served long in house and senate. How would Grant and Colburn have sounded as a campaign cry? Why Wilson made the change is not explained by his biographer. Grant had his name changed from Hiram Clydes. The representative who appointed him to West Point got the name Clydes Simpson, the latter being the maiden name of his mother. So Grant let it remain as the government had made him officially. Grover Cleveland was Stephen Grover, the late Whitehall Reid was Jacob Whitehall Reid, and Speaker Clark was christened James Beauchamp Clark. Former Senator Dick's full name is Charles William Frederick, but he dropped it when he was elected to the senate. Woodrow Wilson was Thomas Woodrow Wilson. Washington Post.

The Year of the Sudden Change. One of the most remarkable stories of sudden cold weather is to be found in a famous biography of Abraham Lincoln. The year 1836 was long known as "the year of the sudden change." At noon on Dec. 20 of that year, after a warm, rainy morning, the temperature suddenly fell 40 degrees. A man riding into Springfield, Ill., for a marriage license found the raindrops dripping from his bride and beard, changed "in a second" into freezing icicles. Geese and chickens were caught by their feet and wings and frozen to the wet ground. A drove of 1,000 hogs being driven to St. Louis rushed together for warmth and formed a huge pile. Those inside smothered, while those outside froze, and the ghastly pyramid remained on the prairie for months. The year 1836 was long known as "the year of the sudden change." Those inside smothered, while those outside froze, and the ghastly pyramid remained on the prairie for months. The year 1836 was long known as "the year of the sudden change." At noon on Dec. 20 of that year, after a warm, rainy morning, the temperature suddenly fell 40 degrees. A man riding into Springfield, Ill., for a marriage license found the raindrops dripping from his bride and beard, changed "in a second" into freezing icicles. Geese and chickens were caught by their feet and wings and frozen to the wet ground. A drove of 1,000 hogs being driven to St. Louis rushed together for warmth and formed a huge pile.
